<b>3. COMPETITIVENESS</b> .....	<b>7</b>
<b>4. CURRENT ACCOUNT B. AND LENDING CAPABILITY (Bank of Spain)</b> .....	<b>9</b>
<b>APPENDIX: MAIN FORECASTS FOR SPAIN</b> .....	<b>10</b>

## 1. EXPORT-IMPORT PERFORMANCE

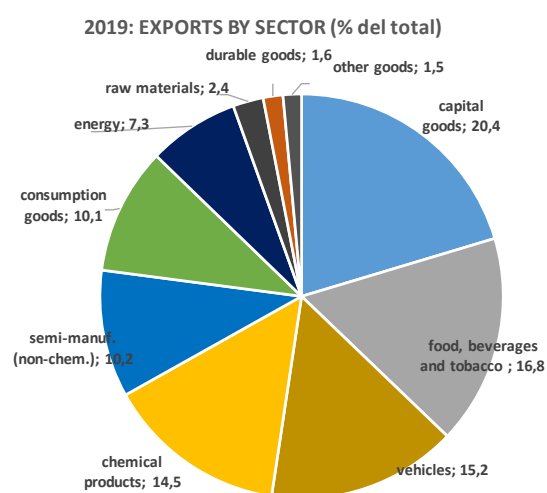

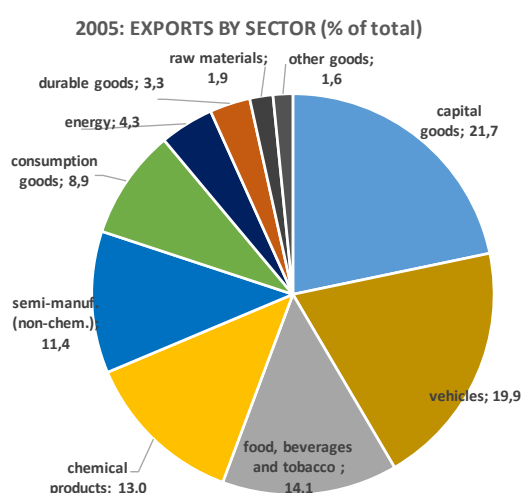

**International trade of goods** (Secretariat of State for Trade of the Ministry of Industry, Trade and Tourism with Customs data, declared trade; [reports](#) -Executive Summary International Trade Report in English- and [customizable data](#))

- In **2019** (provisional data), Spain's exports grew by 1.8% compared to 2018 to 290,089.1 million euros, and imports increased by 1.0% year-on-year to 322,068.7 million euros. In real terms, exports augmented by 1.1% year-on-year, as export prices advanced by 0.7% (according to [unit value indices](#)), and imports rose by 1.1% year-on-year, as import prices fell by 0.1%.
- Spain's trade deficit decreased to 31,979.6 million euros compared to 2018 (deficit of 33,840.0 million euros, provisional data). The export/import coverage ratio reached 90.1%, 0.7 percentage points higher than in 2018 (89.4%, provisional data). The non-energy trade balance reached a deficit of 8,737.2 million euros, compared to a deficit of 8,707.9 million euros in January-December 2018, whereas the energy trade deficit declined by 7.5% year-on-year to 23,242.4 million euros.
- In the period of **January-June 2020**, Spain's exports diminished by 15.8% in the period of January-June 2020 compared to the same period of 2019 to 124,101.4 million euros, and imports declined by 18.8% year-on-year to 131,674.7 million euros. In real terms, exports shrank by 16.1% year-on-year, as export prices expanded by 0.3%, and imports dropped by 17.3% year-on-year, as import prices fell by 1.7%.

### Sectoral composition

- **Spain's main exporting sectors** in 2019 (provisional data) were capital goods (representing 20.4% of total exports, increasing by 3.7% year-on-year), food, beverages and tobacco (16.8% of total, rising by 6.0%), vehicles (15.2% of total, falling by 0.6%) and chemical products (14.5% of total, advancing by 3.2%). The **main contributions** by sector to the annual change of Spain's exports (up by 1.8%) were food, beverages and tobacco (1.0 percentage points), capital goods (0.7 points) and chemical products (0.5 points). On the opposite side, energy products had the largest negative contribution of -0.5 points.

- The **largest shares by sector of Spain's imports** in 2019 were capital goods (representing 21.3% of total and growing by 4.4% year-on-year), chemical products (15.8% of total imports, rising by 4.7%), energy (13.8% of total imports, shrinking by 7.0%) and vehicles (12.5% of total imports, expanding by 0.7%). The **main contributions** by sector to the annual change of Spain's imports (up by 1.0%) were capital goods (0.9 points), chemical products (0.7 points) and consumption goods (0.6 points), whereas on the negative side were energy products (-1.0 percentage points), and raw materials (-0.4 percentage points).
- In the period of **January-June 2020**, main exporting sectors were food, beverages and tobacco (representing 21.1% of total exports, rising by 6.0% year-on-year), capital goods (19.1% of total, shrinking by 21.5%), chemical products (16.4% of total, diminishing by 4.5%) and vehicles (13.3% of total, falling by 29.2%). The largest shares by sector of Spain's imports were those of capital goods (representing 21.6% of total and declining by 17.4% year-on-year), chemical products (19.1% of total imports, dropping by 3.8%), food, beverages and tobacco (12.9% of total imports, falling by 0.4%) and consumption goods (11.8% of total imports, shrinking by 14.3%).
- Although Spain still has a lower degree of diversification than our main European trade partners (Germany, France or Italy), it has notably changed its export mix to a higher degree of sectorial diversification from 2005 to 2019.

## Geographic analysis

- **Exports to the European Union (EU28)** represented 65.7% of total exports in 2019 (up from 65.6% in 2018 with provisional data) and increased by 2.0% year-on-year, while exports to the euro area ran at 51.5% of total (identical value as in the same period of 2018) and went up by 1.7%. Exports to the rest of the world amounted to 34.3% of total exports (34.4% in the same period of 2018) and augmented by 1.3% year-on-year.

## Spanish external sector and competitiveness: facts and figures

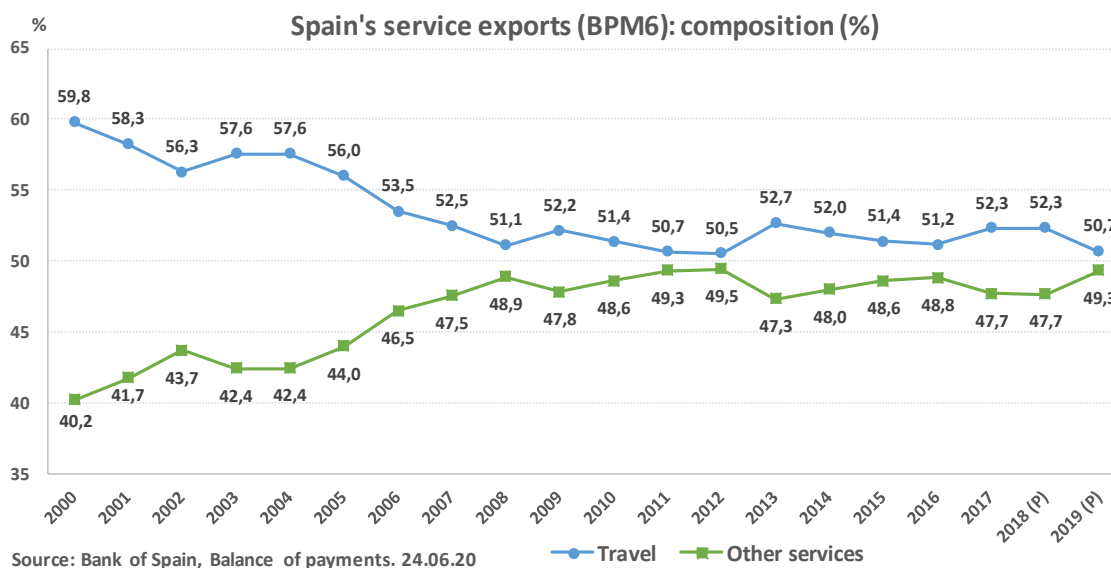

- Along the decade, exports to non-EU28 countries have **increased their share** in Spanish exports from 27.5% of total in 2005 to 34.3% in 2019, with a maximum of 37.4% in 2013. In 2019, exports to North America increased by 9.2% year-on-year (exports to the U.S. increasing by 13.6% y-o-y, while those to Canada growing by 7.4%), and those to Latin America fell by 1.1% (especially to Argentina that decreased by 28.8% or to Mexico by 5.8%). Exports to Asia augmented by 2.4% (South Korea by 12.2%, China by 8.4% and Japan by 7.8%) and those to Africa increased by 0.5% (particularly to South Africa 26.0% and Morocco by 3.6%). Finally exports to Oceania decreased by 2.7% (Australia diminishing by 2.8%).
- In the period of **January-June 2020**, exports to the EU-27 represented 60.4% of total exports in the period (up from 59.5% in the same period of 2019) and diminished by 14.6% year-on-year, and exports to the euro area ran at 52.7% of total (51.9% in the same period of 2019) and declined by 14.5%. Exports to the rest of the world amounted to 39.6% of total exports (40.5% in the same period of 2019) and fell by 17.5% year-on-year. Imports from the EU-27 accounted for 50.7% of total (up from 50.1% in the same period of 2019) and fell by 17.8% year-on-year. Imports from the euro area amounted to 42.8% (42.7% in the same period of 2019) and dropped by 18.5%. Imports from the rest of the world ran at 49.3% of total imports (49.9% in the same period of 2019) and decreased by 19.7% year-on-year.
- In 2019, exports of goods and services in volume grew more intensively than imports leading to a **positive contribution of the external sector to GDP of 0.5 p.p.** (2.0% GDP y-o-y change in real terms), according to the [National Statistics Institute \(INE\)](#). According to [Government's Macroeconomic Scenario 2020-2021](#) (updated on 30.04.20) the forecast for the contribution of the external demand is 0.5 p.p. for 2020 and 1.0 p.p. for 2021. The Bank of Spain, in turn, forecasts a contribution of the external demand in the range of -0.8/-0.5 for 2020 and 1.2/1.7 for 2021 ([Macroeconomic projections for the Spanish economy \(2020-2022\). June 2020](#)).

### Sectorial and geographic analysis of exports of services (Bank of Spain, Balance of Payments, BPM6, [monthly](#), and [quarterly](#)).

- **In 2019, exports of services increased by 6.5% year-on-year to 140,456 million euros**, the highest value ever-achieved ([Bank of Spain](#) data extracted on 24.06.20). This rise in 2019 was due to the increase of 3.2% in travel (tourism) and 10.1% in other services. **In the year to the first quarter of 2020** exports of services amounted 8.479, 9.5% lower than in the same period of 2019, due to the decrease of 23.6% in tourism and travel and the increase of 1.2% in other services.

- The **share of other services** in the total exports of services has grown from 40.2% in 2000 to 49.3% in 2019, close to its maximum of 49.5% in 2012.

- In 2019 (BPM6, [Bank of Spain](#)), 49.3% of Spanish exports of services corresponded to other services (non-travel). By type of service, other business services represented 16.8% of total service exports, followed by transport services with 11.7% of total, and by telecommunications, computer and information services with 9.2% of total.
- In 2019 (BPM6, [Bank of Spain](#)), 73.6% of Spanish exports of total services went to the Europe (49.4% to EU-27 and 42.9% to the euro area), 24.2% to Europe non-EU, 7.4% to North America, 7.2% to Asia, 5.4% to South America, 3.0% to Central America, 2.6% to Africa and 0.8% to Oceania. By countries, the most important destinations were the U.K. (15.5%), France (11.0%), Germany (10.7%), the United States (6.6%), the Netherlands (5.1%) and Switzerland (4.8%).

### **Exports of goods and services, % of GDP ([Eurostat](#))**

- In the recent years, Spanish exports of goods and services have risen steadily in terms of GDP. According to Eurostat, Spanish exports of goods and services reached 34.9% of GDP in 2019, 11.8 p.p. higher than in 2009, and a greater ratio than in Italy, France or the United Kingdom.

## 2. EXPORT BASE

**Spanish exporters** (Secretariat of State for Trade of the Ministry of Industry, Trade and Tourism with Customs data; [customizable data](#))

- Another factor explaining the performance of the Spanish external sector is the **increase in the export base**. In 2019, the number of **regular exporters** (those that have already exported in the current year as well as in each of the three preceding years with declared trade) **rose by 2.3%** year-on-year and reached 52,949, the eighth consecutive year of increase. The number of exporters over 50,000€ increased by 1.5% y-o-y to 38,828, 1.5% higher than in 2018 and 10.4% higher than in 2010.

- The number of regular exporters has risen by 10.8% in the period 2019-2015. In 2019, regular exporters accounted for 95.1% of total declared exports value and 4,267 firms exporting over 5 million euros (in the current year as well as in each of the three preceding years) accounted for 81.7% of Spain's foreign declared sales.

Source: Secretariat of State for Trade with Customs data. \*2019 provisional data.

- In 2019, the number of Spanish exporters selling abroad over 50,000€ annually (38,828 exporters), were responsible for almost all exports by value (99.8%). In the upper sections, in 2019 there were 782 companies exporting more than 50 million euros from 634 in 2015, concentrating 63.7% % of total exports in 2019 from 61.3% in 2015.

### 3. COMPETITIVENESS

#### Price-based competitiveness indices

- In 2019, according to [Eurostat](#), the average inflation rate in Spain reached 0.8% year-on-year, 0.9 p.p. lower than in the previous year. In the EU-27, the inflation annual rate was 1.4% and 1.2% in the euro area. In the EU largest economies, the inflation rates were in Germany, 1.4%, France, 1.3%, Italy, 0.6%, and in the UK, 1.8%.

- According to the [Quarterly Report on Competitiveness Indices](#) of the Secretariat of State for Trade (11.08.20), with data based on ICP (index of consumer prices), Spain increased its price competitiveness in the first semester of 2020 compared to the same semester of the previous year vis-à-vis the euro area (-0.8%) as well as vis-à-vis the EU (-0.6%). In the latter, this is due to the gains in relative prices (-1.1%) that more than offset the appreciation of the euro in the period (0.5%). Vis-à-vis the OECD countries, Spain's competitiveness increased in the first semester of 2020 (-0.8% y-o-y), due to the combination of lower inflation (-1.2%) and the appreciation of the euro against the currencies of the OECD countries (0.4%). Vis-à-vis the emerging economies (BRICS), Spain gained price competitiveness in the first semester of 2020 (-0.4% y-o-y) due to gains from relative prices (-3.6%) that more than offset the appreciation of the euro (3.3%). In 2019, Spain increased its price competitiveness compared to 2018 vis-à-vis the euro area (-0.7%) as well as vis-à-vis the EU27 (-0.6%). In the latter, this is due to the gains in relative prices (-0.8%) that more than offset the appreciation of the euro in the period (0.2). Vis-à-vis the OECD countries, Spain's competitiveness increased in 2019 (-2.4% y-o-y), due to the combination of the depreciation of the euro against the currencies of the OECD countries (-1.4%) and lower inflation (-1.0%). Vis-à-vis the emerging economies (BRICS), Spain also gained price competitiveness in 2019 (-3.6% y-o-y) due to gains from relative prices (-2.6%) and the depreciation of the euro (-1.0%).

#### Other competitiveness indicators

- The evolution of nominal unit labour costs (ULC) in Spain is helping to gain competitiveness. According to [Eurostat](#), Spanish nominal ULC based on persons grew to a lesser extent than those of the euro area and EU-27 from 2009 until 2018, only to become slightly higher in 2019.

- Total Factor Productivity (TFP) in Spain has risen for the seventh year in a row in 2019, according to European Commission data ([AMECO](#), updated 6.5.20). TFP increased in Spain in 2019 by 0.04% as well as in the EU-27 (0.25%), Italy (0.10%) and the U.K. (0.35%) whereas it fell in the euro area (-0.01%), Germany (-0.42%) and France (-0.10%).

### Market share – based competitiveness indicators

- According to the latest data of the WTO (April 2020), in 2019 **Spain's exports of goods** reached 344 billion USD, **maintaining its weight** in international goods exports **at around 1.8%**, and attaining 16<sup>th</sup> position in the ranking of leading exporters (source: [WTO Data](#)).

#### 4. CURRENT ACCOUNT B. AND LENDING CAPABILITY ([Bank of Spain](#))

- The good performance of the Spanish trade balance is the main factor that explains the correction of the current account deficit, from -9.4% of GDP in 2007 to 2.0% surplus in 2019, eight consecutive surplus, with data from [Bank of Spain](#) (24,552 million euros, data published on 24 June 2020 by [Bank of Spain](#)).
- The services balance has also played a positive role in the last few years, moving from a surplus of 3.0% of GDP in 2007 to a surplus of 5.1% of GDP in 2019 (62,913 million euros, [Bank of Spain](#)).
- The aggregate balance of the capital account and the current account in 2019 shows a surplus against **the rest of the world of 28,624 million euro, 2.3% of GDP with BoP data**, eight consecutive surplus (in 2018, 29,052 million euro, 2.4% of GDP), in sharp contrast with the borrowing needs of 97,533 million euros (-9.1% of GDP) in 2007.

## Spanish external sector and competitiveness: facts and figures

- According to Bank of Spain forecasts ([Macroeconomic projections for the Spanish economy \(2020-2022\). June 2020](#)), Spain is expected to obtain a net lending capacity in the range of 2.3/2.5% of GDP in 2020 and 3.3/3.5% in 2021.
